

After two years of experimenting, NetNam as the network of Institute of Information Technology was founded as the first e-mail provider in Vietnam in 1994, under the domain name .vn. E-mail based services such as forums, e-library, etc had been provided to thousands of clients just within one year after introduction.

Other services as Web, FTP, telnet, etc become available when NetNam was officially given the ISP license since 1997. NetNam Corporation was one of the first official ISPs in Vietnam. In 1998, NetNam Corporation was established, with the mission of being the bridge between the academy environment and the market.

Mission

Being the bridge between the academic field and the real market, NetNam has the mission of implementation the research results to the real life, focusing on the networking + Internet solutions, open-source software technologies.
