

## FTTH Service

FTTH is the most updated Internet access technology using optical fiber to replace all or part of the usual metal local loop in the world which Japan and Korea are pioneering.

### Benefits of FTTH SkyNET

- With the advantages of fiber optic cable, FTTH does not have to suffer from bad climate, electricity, magnetic and wave interference. You will always have stable, continuous signal during our connection.
- Being convenient in upgrading the bandwidth in no need of replacing new cable and equipment.
- Download and Upload speeds are equal at a very high one which can serve hundreds of computers at the same time and accelerate your own mail server, web server accessing speed.
- Minimum Internet committed speed of FTTH is 384 Kbps which is higher than the minimum Internet of all ADSL packages.
- Especially effective in services: Private Hosting Server, VNP (Private Virtual Network), data transferring, Game Online, IPTV (Interactive TV), VOD (Videos on Demand), Video Conference, IP Camera, public Internet accessing.
- As professional welding machines are used in the connecting process, there will be no information leakage which creates an absolute reliability for users.
